

# Excel for Accounting Professionals: Session 8

Written and Presented by: Jeff Lenning CPA CITP

## Chapter 21: Dynamic Headers

- Dynamic Headers
  - Are created with functions
  - That return \_\_\_\_\_ values

## Chapter 22: Horizontal Reports

- SUMIFS supports horizontal orientation
- *“Add up this row, only include those columns where this row is equal to this value”*

## Chapter 23: Mapping Tables

- Data Flow: \_\_\_\_\_ > \_\_\_\_\_ > \_\_\_\_\_

## Chapter 24: Data Validation and Reporting

- Data Validation allows a list of choices
- Provide user with dynamic report; filter; validate input

## Chapter 25: Improve Error Check

- Boolean values for test results (TRUE/FALSE)
- Comparison formulas rather than IF
- AND function for overview
- Conditional formatting

## Chapter 26: Concepts Applied

- Applied 10+ features, functions, techniques in a single report workbook
- Hands-free report; paste updated values; report amounts update

## Resources

- Excel files containing all examples and formulas presented: [excel-university.com/aicpa](http://excel-university.com/aicpa)
- Jeff Lenning’s Excel University blog: [excel-university.com/blog](http://excel-university.com/blog)
- LinkedIn: [linkedin.com/in/jefflenning](https://www.linkedin.com/in/jefflenning)

## Answers

- That return date values
- Data Flow: data > map > report
